

## Have You Got What it Takes?

The US Army Reserve has a unique asset not found in the active component: Soldiers who have diverse and innovation-related civilian careers. The US Army Reserve Innovation Command serves as the bridge between the Army's modernization efforts and innovators in the civilian sector. USARIC Soldiers provide unique access to private sector innovators and technology leaders through the Army Reserve Soldiers already employed in those fields. USARIC Soldiers help locate, define and accelerate innovations and technologies, to enhance the Army's lethality and warfighting ability.

# US Army Reserve Innovation Command

## The USARIC Needs You

The Office of the Chief, Army Reserve (OCAR) has developed the US Army Reserve Innovation Command, which leverages talent and resources across the Army Reserve, to anticipate, identify and solve technology and innovation gaps in order to improve Army warfighting readiness.

The vision for the Innovation Command is to drive operational innovation, concepts and capabilities to enhance the readiness and lethality of the Future Force by harnessing the unique skills, agility and private sector connectivity of America's Army Reserve.

Why? The command offers the Army Reserve the capability to provide a tech scouts and subject matter experts, in order to accelerate innovation within the Army and provide access to private sector innovators and technology leaders through Army Reserve Soldiers employed in those fields.

## What You Need to Know

**US Army Reserve Innovation Command taps into the unique skills, agility and private sector connectivity already found in America's Army Reserve**

In particular, the Innovation Command is focused on areas that can lead to technology dominance, including AI, Space, Robotics/Autonomy, Medical/Synthetic Bio, Gaming Simulations/VR/AR, Blockchain, Human Capital and Operations, Cyber/Wireless, Big Data, Energy/Materials

- USARIC Soldiers are Tech Scouts, using their unique relationships to enhance Army modernization
- USARIC Soldiers are Subject Matter Experts in a variety of innovative fields, leveraging civilian positions they hold in those fields.
- USARIC Soldiers are Translators, building bridges between Army modernization efforts and the civilian innovation space.

•The USARIC hires thought leaders and innovators, regardless of rank, tenure, MOS or age

•If you think you can make a meaningful contribution to this ecosystem – we want to hear from you!

•Applicants should send a one to two paragraph narrative summary of their applicable background, with a recent resume, to:
